## MULTICHANNEL PIPETTES

### *Easy and light tip mounting and ejection*

Excessive use of the thumb is a major cause of repetitive strain injuries and user discomfort in multichannel pipetting.

The unique design of the **CAPP Aero 96 Multichannel Pipette** considerably reduces the thumb workload. Ejection is simply a matter of applying light pressure to the levered ejector arm.

Thanks to the double O-rings on the aluminum and metal nose cones, the **CAPP Aero 96 Multichannel Pipette** eliminates the need to 'hammer' your pipette into the tips rack to secure the optimal tip mounting. You now need only to apply a slight even pressure to perfectly secure tips to the nose cones. **CAPP Aero 96 Multichannel Pipettes** are one of the lightest pipettes on the market and produce a consistent and reliable liquid transfer result in one ergonomic solution.

### *Single Channel Accuracy and Precision in a Multichannel Package*

The **CAPP Aero 96 Multichannel Pipette** guarantees single channel accuracy and precision across all channels due to the special design and construction of the CAPP piston assembly. The incredibly robust and fully autoclavable pipette body offers easy maintenance while the unique CAPP design with individually replaceable tip bases reduces the cost of what were once inevitable repairs.

The **CAPP Aero 96 Multichannel Pipette's** use of anodized aluminum and metal nose cones instead of plastic ones substantially reduces breakage due to accidental dropping and tips mounting. The majority of internal construction parts are made of lightweight metal components and, along with stainless steel pistons, ensure a highly robust performance for ultimate stability over time in terms of accuracy and precision. This smart and highly ergonomic pipette is built to last.

## REAGENT RESERVOIRS

Use your reagent most efficiently with **CAPP *Origami*** Reagent Reservoirs.

The **CAPP *Origami*** represents a new way of thinking when it comes to reagent reservoirs.

The stiff architecture procure a consistently sharp V-shape reservoir. This makes pipetting easier and assures an efficient use of the reagent.

They are packed, shipped and stored as flat sheets.

To use the reservoir, simply flick it up by pushing the sides together. This environmentally and storage friendly product will save bench space and money.
